

ZAKROCZYM COMMUNITY FAIR PLAY COMMUNITY

Surface: 7,142 ha
Population: nearly 6,500

The Zakroczym Community is located in the north-western part of the Mazovian Voievodship, 25 km away from Warsaw. The community is bordered by Pomiechówek and Nowy Dwór Mazowiecki to the east, Czosnów and Leoncint the south, and the communities Joniec, Załuski and Czerwińsk nad Wisłą to the west. Zakroczym is one of the oldest towns in Poland.

The mayor of the Zakroczym community, Henryk Ruszczyk explains how he is going to support investors' enterprises.

Within the area of our community there are places, which due to the existing infrastructure and their destination in the land development plan are attractive for potential investors. It is worth mentioning that since there is the Local Land Development Plan being implemented on this area, the administrative procedures which are necessary for receiving proper documents have been reduced to a minimum.

There are convenient transport connections which are to be found within the area of the community:

- roads – there are two very important communication arteries running over the area of the community: the E7 two-lane expressway Warsaw-Gdańsk and the national road No. 62 Płock-Zakroczym-Wyszków
- railways – 3 km away from Zakroczym there is a railway station PKP-Modlin, located on the main railway line North-South
- airports – the community neighbours on the Modlin airport
- river ways – there is a levee in the neighbouring Modlin, which one can reach both by the Vistula and the Narew river.

Zakroczym and the areas surrounding it are one of Poland's best base of the vegetable and gardening industry. The production level does not differ from the world standards.

Due to the construction of the Modlin passenger airport, the community of Zakroczym is becoming the best place for starting investments connected with tourism and related areas as well as those connected with the airport operation.

The investment areas in the community of Zakroczym and their destination in the land development plan are becoming the best place for establishing business connected with sport, tourism, gastronomy, hotel industry as well as other economy sectors securing the passenger and goods air traffic.
